

FacilityLive Company Profile

FacilityLive is an Italian high tech startup, headquartered in Pavia and with offices in London and Brussels, which develops an innovative technology platform for the organisation, management and search of information containing a **next generation search engine** with **patents granted in 44 countries worldwide** (including Europe, USA, Canada, Japan, Korea, Russia, Israel, South Africa and Australia).

FacilityLive is considered **one of the European technology platforms of the future**. In fact its disruptive technology, that finds exactly what you are asking for, allows people and organisations have a compelling user experience in information search.

FacilityLive raised over 30 Million Euro of private capital and its current company valuation is 225 Million Euro.

Founded in 2010 by **Mariuccia Teroni** and **Gianpiero Lotito**, innovators for thirty years in the testing of digital technologies in the publishing world, FacilityLive boasts young talents (coming from all over Italy and returned from abroad), managers and international professionals in its structure.

Gartner, the world's leading information technology research and advisory company, included FacilityLive and its "disruptive technology" in four of its prestigious **Global Software Vendor lists**: Enterprise Search, Knowledge Management, Point Based Solutions, Cool Vendor 2014 for CRM.

FacilityLive is the first non-UK company admitted to the **London Stock Exchange's ELITE Programme** in London (read the [FacilityLive profile on ELITE website](#)), is member of the [European Internet Forum \(EIF\)](#), a body created by members of the European Parliament to support the development of digital technology trends in Europe and is one of the very first founding members of the [European Tech Alliance](#), a resource for European governments and institutions to help the industry

scale up and create jobs in Europe.

FacilityLive is not only a technology model, but it is also a new business and cultural model and the voice of the change that the digital transformation is bringing in every area of our lives. For this reason FacilityLive's Founders are invited to tell their experience and vision in some of the most important international events on the academic, scientific, institutional and business arena. Moreover the most prestigious Italian and international media often devote them articles and interviews, such as:

- **CNBC**, the global financial and business news network, that dedicated a [7 minutes worldwide broadcasted interview](#) to FacilityLive's CEO to explain his view on the future of Search in its Breakfast programme;
- **BBC World News**, that dedicated a [4 minutes worldwide broadcasted interview](#) to FacilityLive's CEO in the programme "BBC Business Live" that defined FacilityLive as the "Italian startup trying to change web searching";
- **Franceinfo**, the all news France TV, that [interviewed FacilityLive's CEO](#) on the uniqueness of FacilityLive's technology that is "built to be at the service of humans";
- the **Süddeutsche Zeitung**, the largest German newspaper, that published [an article](#) in the first page of its economy section presenting the "Small Valley" model conceived by Gianpiero Lotito and Mariuccia Teroni as an example of a sustainable European digital ecosystem: the one that FacilityLive is implementing in Pavia.

In 2016 FacilityLive was invited to the *European Council for Competitiveness* organized by the Dutch Presidency of the European Commission where Gianpiero Lotito was the *Innovative Entrepreneur chosen by the Italian Minister of Economic Development* to represent Italy in providing indications on the digital future of Europe.

FacilityLive strongly believes in the creation of a digital ecosystem in Europe that can

foster the birth of a **new European Technology Digital Industry**. For this reason the founders decided to build a global company starting from a small historical town in Italy and want to keep it European.

FacilityLive realised projects for blue chips such as Vodafone and Accenture and for public administrations including the European Commission.
